Hi! I'm a software developer. I write primarily backend applications using Python. I'm also familiar with front-end technologies like HTML, CSS, and JavaScript. I'm comfortable using web frameworks, such as Django and Flask, as well as DevOps technologies, like Docker. I'm also interested in cloud services, especially Google Cloud Platform.

TOOLS

- Python
- JavaScript
- HTML
- CSS
- Django
- Flask
- Docker
- Google Cloud Platform

PROJECTS

TO-DO LIST

- Created a full-stack web app with full CRUD functionality.
- Built out a Django backend using class-based views with a Gunicorn proxy to serve static files.
- Hosted serverlessly on Google Cloud Platform using Cloud Run.

PORTFOLIO SITE

- Full-stack portfolio website using a Flask backend and an Gunicorn proxy to serve static files.
- Embedded links to Git repos and live versions of my projects.
- Hosted serverlessly on Google Cloud Platform using Cloud Run.

SKILLS

- Object-Oriented Programming (OOP)
- Data Structures and Algorithms
- Attention to Detail
- Communication
- Problem Solving
- Back-end Technologies
