Hi! I'm a software developer. I write primarily backend applications using Python. I'm also familiar with front-end technologies like HTML, CSS, and JavaScript. I'm comfortable using web frameworks, such as Django and Flask, as well as DevOps technologies, like Docker. I'm also interested in cloud services, especially Google Cloud Platform.

SKILLS

- Python
- JavaScript
- HTML
- CSS

- Django
- Flask
- Docker
- Google Cloud Platform

PROJECTS

BUDGETING APP

- Created a full-stack web app to track reading progress with full CRUD functionality
- Used Gunicorn to serve static files hosted in a Cloud Storage Bucket
- Built out a Django backend using class-based view.
- Configured Docker to containerize the application.
- Deployed serverlessly with Cloud Run on Google Cloud Platform
- Hid secrets on Cloud Secrets, and stored user data on Cloud SQL
